

Coolspool 29 Aircraft Start Unit

Summary:

Powerful 28V DC aircraft start unit, fitted with solid state voltmeter, for use with larger twin turbine aircraft and helicopters where additional amp/hour capacity is required to maintain voltage under load.

Typical Powerplants:

PT6

Williams – FJ-33

Arrius

Specifications:

Output voltage: **28V DC**

Output amperage: **2400 Amps (peak)**

Amp/hour capacity: **26 Ah @ 10hr rate (20°C)**

Operating temperature: **-40°C to 45°C (-22°F to 114°F)**

Weight: **63 Lbs**
